

Contemporary Water Governance in the Global South

Forthcoming in May 2013!

Scarcity, Marketization and Participation

Edited by **Leila Harris**, **Jacqueline Goldin**, and **Christopher Sneddon**

Series: *Earthscan Studies in Water Resource Management*

The litany of alarming observations about water use and misuse is now familiar—over a billion people without access to safe drinking water; almost every major river dammed and diverted; increasing conflicts over the delivery of water in urban areas; continuing threats to water quality from agricultural inputs and industrial wastes; and the increasing variability of climate, including threats of severe droughts and flooding across locales and regions. These issues present tremendous challenges for water governance.

This book focuses on three major concepts and approaches that have gained currency in policy and governance circles, both globally and regionally—scarcity and crisis, marketization and privatization, and participation. It provides a historical and contextual overview of each of these ideas as they have emerged in global and regional policy and governance circles and pairs these with in-depth case studies that examine manifestations and contestations of water governance internationally.

The book interrogates ideas of water crisis and scarcity in the context of bio-physical, political, social and environmental landscapes to better understand how ideas and practices linked to scarcity and crisis take hold, and become entrenched in policy and practice. The book also investigates ideas of marketization and privatization, increasingly prominent features of water governance throughout the global South, with particular attention to the varied implementation and effects of these governance practices. The final section of the volume analyzes participatory water governance, querying the disconnects between global discourses and local realities, particularly as they intersect with the other themes of interest to the volume. Promoting a view of changing water governance that links across these themes and in relation to contemporary realities, the book is invaluable for students, researchers, advocates, and policy makers interested in water governance challenges facing the developing world.

Selected Table of Contents

1. Introduction **Part 1: Exploring Hegemonic Concepts: Histories, Contexts, and Questions**
2. Water, Governance, and Hegemony: *C. Sneddon*
3. Response: What these Concepts Mean from a Scientific-Engineering Perspective: *L. Baker* **Part 2: Crisis and Scarcity of Water**
4. Producing Crisis: Hegemonic Debates and Mediations and Representations of Water Scarcity: *B. Mahayni*
5. Tensions in Narratives and Lived Realities of Water Crisis in Damascus: *B. Mahayni*
6. Abundance and Scarcity Amidst the Crisis of 'Modern Water': Changing Water- Energy Nexus in Turkey: *S. Erensu*
7. Water Scarcity and the Colonial State: The Emergence of a Hydraulic Bureaucracy in South-Western Matebeleland, Zimbabwe, 1964-1972 : *M. Musemwa*
8. Activist Response: Uygar Ozesmi
9. Academic Response: Samer Alatout **Part 3: Water Marketization and Privatization**
10. Framing the Debate on Water Marketization and Privatization: *L. Harris*
11. Variable Histories and Geographies of Marketization and Privatization: *L. Harris*
12. (Dis)connecting the Flow, Steering the Waters: Building Hegemonies and 'Private Water' in Zambia, 1930s to the Present: *H. Waters*
13. Meeting the Needs of the Urban Poor in Kenya in the Context of Privatization of Water Supply: *O. A. K'akumu*
14. Activist Response: Shinye Varghese
15. Academic Response: Karen Bakker **Part 4: Participatory Water Governance**
16. The Participatory Paradigm: Anathema, Praise and Confusion: *J. Goldin*
17. Who is a Water User? The Politics of Gender in Egypt's Water User Associations *J. Barnes*
18. Problems and Prospects for Genuine Participation in Water Governance in Turkey: *Z. Kadirbeyoglu and E. Kurtic*
19. Participation's Limits: Tracing the Contours of Participatory Water Governance in Accra, Ghana: *C. Morinville and L. Harris*
20. Activist Response: Annelies Broekman
21. Academic Response: Eric Sheppard
22. Conclusion Summarizing Major Themes and Insights

May 2013 | 224 pages | 234 x 156 | HB: 978-0-415-65799-0: £90.00

About the Editors

Leila Harris is an Assistant Professor in the Institute for Resources, Environment and Sustainability at the University of British Columbia. She is also Co-Director of the Program on Water Governance (PoWG). Her work focuses on nature-society questions including inequality and environment and political ecology, particularly through investigation of water politics, access, and governance in the Global South.

Jacqueline Goldin is the SADC WaterNet Chair for Water and Society and Associate Professor at the Institute for Water Studies, University of the Western Cape where she heads the 'Anthropology of Water Research Group.' The research group focuses on food and water security and the interface between human and ecosystem well-being, with attention to institutional settings as mediators between people and nature.

Christopher Sneddon is an Associate Professor in the Department of Geography and the Environmental Studies Program at Dartmouth College. His research and teaching focus on conflicts over water at multiple spatial scales, with a primary regional focus on the Mekong River basin of Southeast Asia.
